

Today's Students | Tomorrow's Leaders

ABOUT US

Istinye University was established by the 21st Century Anatolian Foundation in 2015, based on 25 years of knowledge and experience from the MLP Care Group which includes 3 different hospital brands, Liv Hospital, Medical Park and VM Medical Park.

Istinye University has planned its education system and academic framework in the manner of satisfying society's requirements both today and in the future. For this reason, the goal of Istinye University is to educate new generations who can maintain their own individual improvements with learning processes and take responsibilities for sustainable developments of society.

New Generation The R&D Centers

Designed by experienced researchers and equipped with high technology, The R&D Centers of Istinye University contribute to public and academic studies in health, social and natural sciences. The newest of The R&D centers also available to students, The Artificial Intelligence in Medicine Research Center, aims to develop and implement projects in the field of interaction between artificial intelligence and medicine.

Social Life at the Campus

Boasting a campus life brimming with social activity through more than 50 student clubs, Istinye University has designed for its students an academic environment enhanced with fitness centers, libraries and study rooms to allow them to get the best out of their university education. The Istinye University Student Center provides students with a colorful university life through a variety of events it organizes throughout the year while preparing them for their future careers.

Double Major and Minor Opportunities

Istinye University students may do a double major and minor in other undergraduate programmes within quota limits, if they provide the necessary requirements to apply for double major and minor programmes.

A Rising Value: International Education

Istinye University, which has over 500 international students from 60 different countries and offers academic courses in English, sends its students on international exchange programs as part of international agreements. Communicating with educational institutions and managing the student exchange programs to allow students to spend their time abroad free of problems, Istinye University Directorate of International Programs also helps foreign students from other countries coming to our university to study.

ISU-TECH: Entrepreneurial Spirit

Supporting the entrepreneurs in all matters, The Istinye University Technology Transfer Office (ISU-TECH) promotes the entrepreneurial spirit of its students and academics. ISU-TECH supports the process for making creative ideas generated within the university turn into concrete products.

FACULTIES AND INSTITUTES

Faculty of Medicine

With its researcher academic members, R&D Labs, extensive network of hospitals and an academic program with an enriched clinical experience, our Faculty of Medicine trains physicians who are committed to a scientific approach; advocate for universal facts; and who shall contribute to scientific advancements. *Turkish and English Medium Academic Programs of the Faculty of Medicine.*
